The \texttt{cweb} Class
(Internal Interface)

Joachim Schrod\textsuperscript{*}

August 29, 1995
(Revision 3.6 of \texttt{cweb.cls})

1. This document shall describe the internal interface for \TeX\ programmers who want to write packages or subclasses to enhance the \texttt{cweb} class. In particular, it shall describe all control sequences a programmer may redefine to adapt this class to special needs. (There are an awful lot of them, all cseqs that start with `\texttt{Cweb}`.)

Due to time constraints this description has not been written yet. It depends on the demand when it will be written. I.e., if you are a package/class writer and if you want to enhance the \texttt{cweb} class, send me email. Please mention the kind of enhancement you want to do. I will then add information to this description as needed.

\textbf{Revision Log for cweb-conf.tex}

\textbf{Revision 2.1} (created at August 29, 1995 by Joachim Schrod)

\hspace{1em} Added (hint to non-existence of) description of the internal interface.
