The \texttt{holtxdoc} package

Heiko Oberdiek\footnote{Please report any issues at \url{https://github.com/ho-tex/oberdiek/issues}}

<heiko.oberdiek at googlemail.com>

2016/05/17 v0.27

Abstract

The package is used for the documentation of my packages in DTX format. It contains some private macros and setup for my needs. Thus do not use it. I have separated the part that may be useful for others in package hypdoc.

\footnote{Please report any issues at \url{https://github.com/ho-tex/oberdiek/issues}}
Caution: This package is not intended for public use!

It contains the macros and settings to generate the documentation of my packages in \texttt{CTAN:macros/latex/contrib/oberdiek/}. Thus the package does not know anything about compatibility. Only my current packages’ documentation must compile.

Older versions were more interesting, because they contained code to add hyper-refer’s features to \LaTeX’s \texttt{doc} system, e.g. bookmarks and index links. I separated this stuff and made a new package \texttt{hypdoc}.

\section{Implementation}

\subsection*{1 \texttt{\LaTeX} \texttt{\LaTeX\ X2\ e}}

Package identification.

3 Installation

3.1 Download

Package. This package is available on CTAN:\n

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

CTAN:install/macros/latex/contrib/oberdiek.tds.zip

TDS refers to the standard “A Directory Structure for \TeX\ Files” (CTAN:tds/tds.pdf). Directories with texmf in their name are usually organized this way.

\footnote{http://ctan.org/pkg/holtxdoc}
3.2 Bundle installation

Unpacking. Unpack the oberdiek.tds.zip in the TDS tree (also known as texmf tree) of your choice. Example (linux):

```
unzip oberdiek.tds.zip -d ~/texmf
```

Script installation. Check the directory TDS:scripts/oberdiek/ for scripts that need further installation steps. Package attachfile2 comes with the Perl script pdfatfi.pl that should be installed in such a way that it can be called as pdfatfi. Example (linux):

```
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
```

3.3 Package installation

Unpacking. The .dtx file is a self-extracting docstrip archive. The files are extracted by running the .dtx through plain T\TeX:

```
tex holtxdoc.dtx
```

TDS. Now the different files must be moved into the different directories in your installation T\TeX tree (also known as texmf tree):

```
holtxdoc.sty → tex/latex/oberdiek/holtxdoc.sty
holtxdoc.pdf → doc/latex/oberdiek/holtxdoc.pdf
holtxdoc.dtx → source/latex/oberdiek/holtxdoc.dtx
```

If you have a docstrip.cfg that configures and enables docstrip’s TDS installing feature, then some files can already be in the right place, see the documentation of docstrip.

3.4 Refresh file name databases

If your T\TeX distribution (te\TeX, m\ik\TeX, ...) relies on file name databases, you must refresh these. For example, te\TeX users run texhash or mktexlar.

3.5 Some details for the interested

Unpacking with l\at\TeX. The .dtx chooses its action depending on the format:

plain T\TeX: Run docstrip and extract the files.

l\at\TeX: Generate the documentation.

If you insist on using l\at\TeX for docstrip (really, docstrip does not need l\at\TeX), then inform the autodetect routine about your intention:

```
l latex \let\install=y\input{holtxdoc.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

Generating the documentation. You can use both the .dtx or the .drv to generate the documentation. The process can be configured by the configuration file ltxdoc.cfg. For instance, put this line into this file, if you want to have A4 as paper format:

\PassOptionsToClass{a4paper}{article}

An example follows how to generate the documentation with pdfl\at\TeX:

```
pdflatex holtxdoc.dtx
makeindex -s gind.ist holtxdoc.idx
pdflatex holtxdoc.dtx
makeindex -s gind.ist holtxdoc.idx
pdflatex holtxdoc.dtx
```
4 Catalogue

The following XML file can be used as source for the TeX Catalogue. The elements *caption* and *description* are imported from the original XML file from the Catalogue. The name of the XML file in the Catalogue is *holtxdoc.xml*.

```
<catalogue>
  <entry datestamp='$Date$' modifier='$Author$' id='holtxdoc'>
    <name>holtxdoc</name>
    <caption>Documentation macros for oberdiek bundle, etc.</caption>
    <authorref id='auth:oberdiek'/>
    <copyright owner='Heiko Oberdiek' year='1999-2012'/>
    <license type='lppl1.3'/>
    <version number='0.27'/>
    <description>
      These are personal macros, which are not necessarily useful to
      other authors (they are provided as part of the source of others
      of the author’s packages). Macros that may be of use to other
      authors are available separately, in package
      \texttt{hypdoc}. The package is part of the \texttt{oberdiek} bundle.
    </description>
    <documentation details='Package documentation'

5 History

[1999/06/26 v0.3]
- ...

[2000/08/14 v0.4]
- ...

[2001/08/27 v0.5]
- ...

[2001/09/02 v0.6]
- ...

[2006/06/02 v0.7]
- Major change: most is put into a new package hypdoc.

[2007/10/21 v0.8]
- \texttt{\LaTeXe} and \texttt{\LaTeXeX} added.
[2007/11/11 v0.9]
• \LuaTeX added.

[2007/12/12 v0.10]
• \iniTeX added.

[2008/08/11 v0.11]
• \Newsgroup, \xnewsgroup, and \URL updated.

[2009/08/07 v0.12]
• \xmodule added.

[2009/12/02 v0.13]
• Anchor hack for unnumbered subsections is removed for \hyperref ≥ 2009/11/27 6.79k.

[2010/02/03 v0.14]
• \XeTeX and \XeLaTeX are made robust.

[2010/03/10 v0.15]
• \LuaTeX changed according to Hans Hagen’s definition in the luatex mailing list.

[2010/04/03 v0.16]
• Use date and time of .dtx file.

[2010/04/08 v0.17]
• Option pdfencoding=auto added for package \hyperref.
• Package hologo added.

[2010/04/18 v0.18]
• Standard index prologue replaced by corrected prologue.

[2010/04/24 v0.19]
• Requested date of package hologo updated.

[2010/12/03 v0.20]
• History is now set using \raggedright.

[2011/02/04 v0.21]
• GL needs \protected@edef instead of \edef in \HistLabel.

[2011/11/22 v0.22]
• Font stuff added for LuaL\TeX.
