1 Introduction

This document describes the \texttt{ijodl} option for the \texttt{SVJOUR} \LaTeX{} document class. For details on manuscript handling and the review process we refer to the \textit{Instructions for authors} in the printed journal. For style matters please consult previous issues of the journal.

2 Initializing the class

As explained in the main \textit{Users guide} you can begin a document for the \textit{International Journal on Digital Libraries} by including

\begin{verbatim}
\documentclass[ijodl]{svjour}
\end{verbatim}

as the first line in your text. All other options are also described in the main \textit{User guide}.
